

VOLUME 23 NO. 2 1997–98  
**REAL ANALYSIS**  
**EXCHANGE**

CONTENTS

EDITORIAL MESSAGES . . . . .	357
Zygmunt Zahorski 1914–1998 . . . . .	359
SURVEY	
Sara Hawtrey Jones	
Applications of the Baire Category Theorem . . . . .	363
RESEARCH ARTICLES	
Miroslav Krbeč and Thomas Schott	
Embeddings of Weighted Sobolev Spaces . . . . .	395
S. J. Agronsky, J. G. Ceder and T. L. Pearson	
Some Characterizations of Darboux Baire 1 Functions . . . . .	421
Tamás Keleti	
Periodic $L_p$ Functions with $L_q$ Difference Functions . . . . .	431
Krzysztof Ciesielski and Tomasz Natkaniec	
Darboux Like Functions That Are Characterizable by Images, Preimages and Associated Sets . . . . .	441
Dariusz Doliwa and Ryszard Jerzy Pawlak	
On the Almost Continuity of the Diagonal of Functions . . . . .	459
V. Anandam and M. Damlakhi	
Harmonic Singularity at Infinity in $\mathbb{R}^n$ . . . . .	471
Vasile Ene	
Lusin’s Condition <b>(N)</b> and Foran’s Condition <b>(M)</b> are Equivalent for Borel Functions That Are <b>VBG</b> on a Borel Set . . . . .	477
Vasile Ene	
Hake–Alexandroff–Looman Type Theorems . . . . .	491
Julia Genyuk	
A Typical Measure Typically Has No Local Dimension . . . . .	525
F. S. Cater	
On Continuous One-to-One Functions on Sets of Real Numbers . . . . .	539
Antonis Bisbas	
A Note on the Distribution of Digits in Triadic Expansions . . . . .	545
Krzysztof Ciesielski	
Characterizing Derivatives by Preimages of Sets . . . . .	553
Harvey Rosen	
An Almost Continuous Nonextendable Function . . . . .	567
Vasile Ene	
Characterizations of $\mathbf{VB}^*\mathbf{G} \cap (\mathbf{N})$ . . . . .	571
Zbigniew Grande and Stanislaw P. Ponomarev	
On Differentiability of Functions of Two Variables . . . . .	601
Vasile Ene	
Characterizations of $\mathbf{VBG} \cap (\mathbf{N})$ . . . . .	611
Harvey Rosen	
Darboux Quasicontinuous Functions . . . . .	631
F. S. Cater	
On Derivatives Vanishing Almost Everywhere on Certain Sets . . . . .	641

L. Zajíček	
Ordinary Derivatives Via Symmetric Derivatives and a Lipschitz Condition Via a Symmetric Lipschitz Condition . . . . .	653
Krzysztof Ciesielski, Richard G. Gibson and Tomasz Natkaniec	
$\kappa$ -to-1 Darboux-Like Functions . . . . .	671
In Soo Baek	
Dimensions of Weakly Convergent Deranged Cantor Sets . . . . .	689
<b>INROADS</b>	
F. S. Cater	
On Monotonic and Analytic Functions in $C^\infty$ . . . . .	697
Irene Mulvey	
A Geometric Algorithm to Decide the Forcing Relation on Cycles . . . . .	709
Vasile Ene	
The Wide Denjoy Integral as the Limit of a Sequence of Stepfunctions in a Suitable Convergence . . . . .	719
D. N. Sarkhel	
On the Approximately Continuous Integrals of Burkill and Kubota . . . . .	735
Ewa Strońska	
On the Maximal Families for Some Special Classes of Strongly Quasi-Continuous Functions . . . . .	743
Kenneth S. Miller and Stefan G. Samko	
A Note on the Complete Monotonicity of the Generalized Mittag-Leffler Function	753
A. K. Layek	
Intersection Properties of Directional Essential Cluster Sets . . . . .	757
Eduardo J. Dubuc	
A Note on Cantor Sets . . . . .	767
Marta Babilonová	
On a Conjecture of Agronsky and Ceder Concerning Orbit-Enclosing $\omega$ -Limit Sets	773
Henry Fast	
A Few Remarks about Equality of Indicatrices of Two Functions and a Conjecture	779
Artur Bartoszewicz	
On Density Points of Subsets of Metric Space with Respect to the Measure Given by Radon-Nikodym Derivative . . . . .	783
Marek Balcerzak and Krzysztof Ciesielski	
On the Sup-Measurable Functions Problem . . . . .	787
Chew Tuan-Seng, Wong Woon-Kwong and Tan Geok-Choo	
On Absolutely Henstock Integrable Functions . . . . .	799
Chris Freiling	
On the Problem of Characterizing Derivatives . . . . .	805
Hussain Elalaoui-Talibi	
A Remark on Graphs of Marczewski Measurable Functions . . . . .	813
