

EDITORIAL MESSAGES

By Paul D. Humke

Something New. In this issue we begin an new section of the *Exchange* entitled *Plenary Lectures*. These papers are extended summaries of the invited plenary talks presented at recent *Summer Symposia in Real Analysis* and will be available free of charge to all on our website.

Thanks and Welcome. Viktor Kolyada has been an integral part of our Editorial Board for the past several years and has decided to retire. We owe him a great debt for his conscientious dedication to real analysis. Thank you Viktor, you are missed. Simultaneously we welcome Andrei Lerner from Bar-Ilan University, Ramat Gan, Israel who will take over the editorial work for papers submitted in harmonic and Fourier analysis and inequalities. Welcome, Andrei!

Assistant Editors. Our dedicated Assistant Editors Benjamin Bruce and Jennifer Crawford of St. Olaf College manage the day-to-day operations of the Editorial Office and prepare papers for publication. They do our community a great service and It's an honor to work with them. They are both fourth year students and will attend graduate school next year. As such, we are currently in the process of hiring.

Contributors. We extend our grateful thanks to those who contributed to one of the *Real Analysis Exchange* special funds during this past year. Please see the next page for details on contributing.

Author Class File. Our raex.cls L^AT_EX classfile is used with every paper published in the *Exchange*. This classfile utilizes a format for entering author, title and other information that is particularly convenient for extracting that information for the various databases that list the *Exchange*. An author version of the raex.cls classfile is available at our website: www.stolaf.edu/analysis.

Advertisements. Please note the advertisements at the end of each issue. These promote real analysis or other Michigan State University Press publications and therefore help support the production of our journal. If you have written a book, or have an item of interest you wish to publicize in the Journal, please contact the Michigan State University Press Journals Division.

Michigan State University Press. If you are contemplating writing a textbook on a subject in mathematics, or a memoir, please consider using the Michigan State University Press as your publisher. The Press is a non-profit organization affiliated with Michigan State University that offers superior service and much lower costs than commercial publishers, along with complimentary advertising in *Real Analysis Exchange*.

Website. We encourage you to visit our websites and invite your feedback regarding the content. The addresses are:

- For Article Access: <http://www.msupress.org/journals/raex/>
