CONTENTS

EDITORIAL MESSAGES i

CONFERENCE ANNOUNCEMENTS ii

TOPICAL SURVEYS

John C. Morgan II
Completion from an Abstract Perspective 233

RESEARCH ARTICLES

M. Archana and V. Kannan
Intervals Containing All the Periodic Points 263

Ryan M. Berndt and Greg G. Oman
Turning Automatic Continuity Around: Automatic Homomorphisms 271

Dariusz Kosz
On the Discretization Technique for the Hardy-Littlewood Maximal Operators 287

Volodymyr Mykhaylyuk
On the Mixed Derivatives of a Separately Twice Differentiable Function 293

Jimmy Tseng
Nondense Orbits for Anosov Diffeomorphisms of the 2-Torus 307

Balázs Maga
Accumulation Points of Graphs of Baire-1 and Baire-2 Functions 315

INROADS

Kevin Beanland, Paul D. Humke, and Trevor Richards
On Scottish Book Problem 157 331

Emma D'Aniello and T. H. Steele
A Non Self-Similar Set 347

Jan A. Grzesik
Contour Integration Underlies Fundamental Bernoulli Number Recurrence 351

Pier Domenico Lamberti and Giorgio Stefani
Sobolev Subspaces of Nowhere Bounded Functions 367

Oswaldo de Oliveira
The Implicit Function Theorem when the Partial Jacobian Matrix is only Continuous at the Base Point 377
Joseph L. Gerver
A Nice Example of Lebesgue Integration 389
Chris Freiling, Paul D. Humke, and Richard J. O'Malley
An Alternate Solution to Scottish Book 157 403
Chris Freiling, Paul D. Humke, and Richard J. O'Malley
Approximately Continuous Functions Have Approximate Extrema, a New Proof 409
