ROCKY MOUNTAIN JOURNAL OF MATHEMATICS

Volume 37 2007 Number 2

CONTENTS

Convergence by Nondiscrete Mathematical Induction of a Two Step Secant's Method
By S. Amat, C. Bermúdez, S. Busquier and J. Gretay 359

Topological Transitivity and Mixing Notions for Group Actions
By Grant Cairns, Alla Kolganova and Anthony Nielsen 371

Tiling the Unit Square with **5** Rational Triangles
Garikai Campbell, James Brady and Arvind Nair 399

Nonoscillatory Criteria for Second-Order Nonlinear Difference Equations
By Jiqin Deng 419

On Differences of Two Squares in Some Quadratic Fields
By Andrej Dujella and Zrinka Franušić 429

On the Irreducibility of a Truncated Binomial Expansion
By Michael Filaseta, Angel Kumchev and Dmitrii V. Pasechnik 455

Generic Subideals of Graph Ideals and Free Resolutions
By Leah Gold 465

Equal Sums of Sixth Powers and Quadratic Line Complexes
By Masato Kuwata 497

Inversive Difference Modules and Solvability of Systems of Linear Difference Equations
By Alexander B. Levin 519

A Generalized Hawkins Sieve and Prime K-tuplets
By John Lorch 533

Derivative Relationships between Volume and Surface Area of Compact Regions in $\mathbf{R}^d$
By Jean-Luc Marichal and Michael Dorff 551

CONTENTS CONTINUED ON LAST PAGE

A Note on the Existence of Shape-Preserving Projections
By D. Mupasiri and M.P. Prophet 573

Algebraic Vector Bundles on SL(3, **C**)
By Kazunori Nakamoto and Takeshi Torii 587

A Metric Characterization of Normed Linear Spaces
By Timur Oikhberg and Haskell Rosenthal 597

Elliptic Fibrations of Some Extremal $K3$ Surfaces
By Matthias Schütt 609

Basic Functional Equations of the Rogers-Ramanujan Functions
By Seung H. Son 653

Explicit Equations of Some Elliptic Modular Surfaces
By Jaap Top and Noriko Yui 663

Exact Structure of Positive Solutions for a P-Laplacian Problem Involving Singular and Superlinear Nonlinearities
By Shin-Hwa Wang and Tzung-Shin Yeh 689
