

ROCKY MOUNTAIN JOURNAL OF MATHEMATICS

Volume 29

Winter 1999

Number 4

CONTENTS

Dual Krull Dimension and Duality
BY TOMA ALBU AND PATRICK F. SMITH 1153

On Height Orthogonality in Normed Linear Spaces
BY JAVIER ALONSO AND MARÍA L. SORIANO 1167

Rank 2 Vector Bundles in a Neighborhood of an
Exceptional Curve of a Smooth Surface
BY E. BALLICO 1185

A Note on Perfect Generalized Ordered Spaces
BY HAROLD R. BENNETT, MASAMI HOSOBUCHI
AND DAVID J. LUTZER 1195

Stability Theorem for the Feynman Integral
via Time Continuation
BY KUN SOO CHANG, JUNG AH LIM
AND KUN SIK RYU 1209

The Lattice of Semilattice-Matrix Decompositions
of a Semigroup
BY MIROSLAV ĆIRIĆ AND STOJAN BOGDANOVIĆ 1225

Chiungtze C. Tsen (1898–1940) and Tsen’s Theorems
BY SHISUN DING, MING-CHANG KANG
AND ENG-TJIOE TAN 1237

Legendre Expansions of Power Series
BY JAMES GUYKER 1271

Positive Solutions for Semi-Positone Systems
in an Annulus
BY D.D. HAI AND R. SHIVAJI 1285

Disconjugacy of Symplectic Systems and Positive
Definiteness of Block Tridiagonal Matrices
BY ROMAN HILSCHER 1301

Some Amplifications and a Correction of Iarrobino’s
Construction of Local Parameters on $\text{Hilb}_{\mathbf{P}_k}^n$
BY MARK E. HUIBREGTSE 1321

Determinants of Certain Classes of Zero-One
Matrices with Equal Line Sums
BY CHI-KWONG LI, JULIA SHIH-JUNG LIN
AND LEIBA RODMAN 1363

Products of Factorials in Binary Recurrence Sequences
BY FLORIAN LUCA 1387

CONTENTS CONTINUED ON BACK PAGE

The Dual of Bergman Metro VMO BY DANIEL H. LUECKING	1413
Local-Global Relations for Almost Completely Decomposable Groups BY A. MADER, O. MUTZBAUER AND C. VINSONHALER	1429
Maximality of the Hypercube Group BY STANISLAUS MAIER-PAAPE	1455
Generators for the Semimodule of Varieties of a Free Module BY R.L. MCCASLAND, M.E. MOORE AND P.F. SMITH	1467
Moufang Loop Multiplication Groups with Triality BY J.D. PHILLIPS	1483
Generalized Hölder-Like Inequalities BY FATHI SAIDI AND RAHMAN YOUNIS	1491
Inverse Map Characterization of Asymptotic Stability on the Line BY HASSAN SEDAGHAT	1505
Modules for which Homogeneous Maps are Linear BY A.B. VAN DER MERWE	1521
For $b \geq 3$ There Exist Infinitely Many Base b k -Smith Numbers BY BRAD WILSON	1531
Quotient Maps with Structure Preserving Inverses BY M. ZIPPIN	1537
Volume Index for Volume 29	1543
