

ROCKY MOUNTAIN JOURNAL OF MATHEMATICS

Volume 26

Summer 1996

Number 3

CONTENTS

Dedication
BY DAVID GRANT AND ROBERT TUBBS 793

The Sequence x/n and its Subsequences
BY R.C. BAKER AND G. HARMAN 795

Solving Norm Form Equations Via
Lattice Basis Reduction
BY MICHAEL A. BENNETT 815

On Large Values of Binary Forms
BY B. BRINDZA 839

Submodules of Products of Quasi-Periodic Modules
BY W. DALE BROWNAWELL 847

Small Solutions to Systems of Linear Congruences
over Number Fields
BY EDWARD B. BURGER 875

Commutative Algebraic Groups and Refinements
of the Gelfond-Feldman Measure
BY DEANNA M. CAVENY 889

Triangular Numbers and Elliptic Curves
JASBIR CHAHAL AND JAAP TOP 937

Estimates for L -Functions Associated with
Some Elliptic Curves
BY FERNANDO CHAMIZO AND HENRYK IWANIEC 951

On Exceptional Sets for Numbers Representable
by Binary Sums
BY SHUNG-FU CHIU AND MING-CHIT LIU 959

Humbert Surfaces and Transcendence Properties
of Automorphic Functions
BY PAULA BEAZLEY COHEN 987

On Mahler's Classification in Laurent Series Fields
BY EUGÈNE DUBOIS 1003

Sequences of Fields with Many Solutions
to the Unit Equation
BY DAVID GRANT 1017

Sur Quelques Conséquences de la Conjecture (abc)
en Arithmétique et en Logique
BY MICHEL LANGEVIN 1031

Nonsingular Zeros of Quintic Forms over Finite Fields
BY DAVID B. LEEP AND CHARLES C. YEOMANS 1043

CONTENTS CONTINUED ON BACK PAGE

A Note on Siegel's Lemma BY D.W. MASSER	1057
Nouveaux Lemmes de Zéros dans les Groupes Algébriques Commutatifs BY PATRICE PHILIPPON	1069
Bases of Number Fields with Small Height BY DAMIEN ROY AND JEFFREY LIN THUNDER.....	1089
Small Salem Numbers, Exceptional Units, and Lehmer's Conjecture BY JOSEPH H. SILVERMAN	1099
Counting Points on CM Elliptic Curves BY H.M. STARK	1115
Diophantine Approximation of Matrices BY G.N. TEN HAVE AND R. TIJDEMAN	1139
Algebraic Independence and Products of Drinfeld Modules BY ROBERT TUBBS	1165
A Note on Hadamard Roots of Rational Functions BY A.J. VAN DER POORTEN	1183
Dependence of Logarithms on Commutative Algebraic Groups BY MICHEL WALDSCHMIDT	1199
An Effective Roth's Theorem for Function Fields BY JULIE TZU-YUEH WANG	1225
A Complete Resolution of a Problem of Erdős and Graham BY KUNRUI YU AND DEHUA LIU	1235
