ROCKY MOUNTAIN JOURNAL OF MATHEMATICS

Volume 23 Summer 1993 Number 3

CONTENTS

On Generalized Absolute Cesàro Summability Factors
By Hüseyin Bor 797

Toeplitz Operators on the Disk with Locally Sectorial Symbols
By Albrecht Böttcher 803

Multipliers of Sequence Spaces
By George Brauer 817

Monotone Open Images of 0-Spaces
By Beverly Diamond 839

Conjugacy Criteria for Second Order Differential Equations
By Ondřej Došlý 849

Polyhedral Norms in an Infinite Dimensional Space
By Roland Durier and Pier Luigi Papini 863

Quasi-uniform Structures in Linear Lattices
By J. Ferrer, V. Gregori and C. Alegre 877

New Proofs of Bing's 1-ULC Taming Theorem and Bing's Side Approximation Theorem
By Davis W. Finley 885

Strongly Extreme Points in Köthe-Bochner Spaces
By H. Hudzik and M. Mastyło 899

Some Interesting Banach Spaces
By R.C. James 911

Covariant Completely Positive Maps and Liftings
By Alexander Kaplan 939

Remarks on Functions with Positive Real Part on the Ball in C^n
By Clinton J. Kolaski 947

Degrees of Closed Curves in the Plane
By Marko Kranjc 951

Neutral Structures on Even-dimensional Manifolds
By Peter R. Law 979

Boundedness and Asymptotics of a Matrix Iteration
By Jeffery J. Leader 999

Mixed Cusp Forms and Poincaré Series
By Min Ho Lee 1009

CONTENTS CONTINUED ON BACK PAGE

Self-similarity
By Gary B. Lewellen 1023

Prime Submodules of Noetherian Modules
By R.L. McCasland and P.F. Smith 1041

K-Theory and Ext-theory for Rectangular Unitary C^*-Algebras
By Kevin McClanahan 1063

Factorizable Semigroup of Partial Symmetries of a Regular Polygon
By Janet Mills 1081

On Absolute Weighted Mean Summability
By C. Orhan and M.A. Sarigöl 1091

Matrix Transformations of Classes of Geometric Sequences
By C.R. Selvaraj and Suguna Selvaraj 1099

A Characterization of Weighted Composition Operators
By R.K. Singh and Bhopinder Singh 1107

The Measure of Approximation in the Two Dimensional Operational Field
By Djurdjica Takači 1115

Uniqueness of Best Approximation with Coefficient Constraints
By Chengmin Yang 1123

Notes on Analytic Feynman Integrable Functionals
By Il Yoo and Kun Soo Chang 1133

Block Type Spaces of Analytic Functions
By Kehe Zhu 1143
