THE ROCKY MOUNTAIN JOURNAL OF MATHEMATICS
Volume 17 Winter 1987 Number 1

CONTENTS

Images and quotients of SO(3, R): remarks on a theorem of Van der Waerden
By W.W. Comfort and Lewis C. Robertson 1
When is a fuzzy topology topological?
By Albert J. Klein 15
A simple characterization of the contact system on $J^k(E)$
By R.B. Gardener and W.F. Shadwick 19
Smoothness to the boundary of conformal maps
By Steven R. Bell and Steven G. Krantz 23
Groups satisfying the weak chain conditions for normal subgroups
By Manfred Karbe 41
On the Azimi-Hagler Banach spaces
By Alfred D. Andrew 49
On valuation rings
By J. Paul Vicknair 55
F-projectors in locally finite groups
By M.R. Dixon 59
On the Picard group of a compact complex nilmanifold-II
By Robert J. Fisher, Jr. 65
Focal points of nonlinear equations—a dynamical analysis
By A.L. Edelson and P.K. Palamides 77
Pointwise convergence of Cauchy sequences
By Paul Creegan 85
The central limit question under ρ-mixing
By Richard C. Bradley 95
Summing subsequences of random variables
By Mark Schwartz 115
Derivations from subalgebras of C^*-algebras with continuous trace
By Aldo J. Lazar, Sze-Kai Tsui amd Steve Wright 121
A computer method for approximating the zeros of certain entire functions
By Amy C. King and J.D. Patterson 135

Tangent ball embeddings of set in E^3
By L.D. Loveland 141
The holonomic imperative and the homotopy groupoid of a foliated manifold
By John Phillips 151
Complexity of computer algorithms
By Ronald J. Leach 167
The arithmetic ring and the Kummer ring of a commutative ring
By D.K. Harrison 189
