**CONTENTS**

Approximation of Linear Operators on a Weiner Space	
By D. LEE .....	641
Extrema and nowhere differentiable functions	
By E.E. POSEY AND J.E. VAUGHAN .....	661
A complete characterization of the level spaces of $R(I)$ and $I(I)$	
By R. LOWEN .....	669
The ideal structure of the space of $\kappa$ -uniform ultrafilters on a discrete semigroup	
By NEIL HINDMAN .....	685
On the spaces classifying complex vector bundles with given real dimension	
By ANDREW BAKER .....	703
Boundedness for Bloch functions	
By RON C. GOOLSBY .....	717
Optimal algorithms for linear problems with Gaussian measures	
By G.W. WASILKOWSKI .....	727
Chordal quadratic systems	
By ARMENGOL GASULL, SHENG LI-REN AND JAUME LLIBRE	751
A remark on the energy of harmonic maps between spheres	
By JAYAKUMAR RAMANATHAN .....	783
The approximate solution of a monotone nonlinear operator equations	
By P.M. ANSELONE AND LEI JIN-GAN .....	791
Une remarque a propos de prolongements holomorphes	
By JEAN-PIERRE ROSAY .....	803
Para-uniformities, para-proximities and H-closed extensions	
By STEPHAN C. CARLSON AND CHARLES VOTAW .....	805
The equicontinuous structure relation and extension of continuous equivariant functions	
By JAN DE VRIES .....	837
Index to Volume 16 .....	855
