

THE ROCKY MOUNTAIN JOURNAL OF MATHEMATICS

Volume 11

Fall 1981

Number 4

CONTENTS

A constructive proximality property of finite dimensional linear spaces	
By DOUGLAS S. BRIDGES	491
Choice sets and measurable sets	
By F.S. CATER	499
On compact convex subsets of $D[0, 1]$	
By PETER Z. DAFFER	501
Crystallographic groups and their mathematics	
By DANIEL R. FARKAS	511
Closure in fuzzy topology	
By ALBERT J. KLEIN	553
Some properties of relative principal cofibrations	
By D.E. KRUSE	561
On generalized mid-point convexity	
By EITAN LAPIDOT	571
An inequality for no-decreasing sequences	
By A. MEIR	577
Tensor products and semi simple modular representations of finite groups and restricted Lie algebras	
By RICHARD K. MOLNAR	581
Height of separable algebras over commutative rings	
By LAWRENCE W. NAYLOR	593
A simple proof and generalization of Weglorz' characterization of normality for ideals	
By DONALD H. PELLETIER	605
Cyclic Ext	
By FRED RICHMAND AND ELBERT WALKER	611
Convergence to pushed fronts	
By FRANZ ROTHE	617
Arithmetic properties of the mean age polynomials	
By HARLAN STEVENS	635
Convergence questions for limit periodic continued fractions	
By W.J. THRON AND HAAKON WAADELAND	641
Three-dimensional hyperbolic spaces	
By NORBERT J. WIELENBERG	659
Index to Volume 11	672
