**CONTENTS**

Preface	
By H. FLASCHKA AND D.W. MCLAUGHLIN	1
Introduction to mathematical techniques for continuous problems	
By H. FLASCHKA AND D.W. MCLAUGHLIN	3
Solitons as approximate descriptions of physical phenomena	
By HARVEY SEGUR	15
The inverse scattering transform, nonlinear waves, singular perturbations and synchronized solitons	
By ALAN C. NEWELL	25
The double-sine-Gordon equation: wobbling solitons?	
By R.K. BULLOUGH AND P.J. CAUDREY	53
Applications of the inverse scattering transform I: self-induced transparency	
By D.J. KAUP	71
A method for solving the periodic problem for the <i>KdV</i> equation and its generalizations	
By S.P. NOVIKOV	83
Time evolution of almost periodic solutions of the <i>KdV</i> equation	
By J.M. HYMAN	95
Envelope solitons and recurrence in nonlinear deep water waves: theory and experiment	
By BRUCE M. LAKE, HENRY C. YUEN AND WARREN E. FERGUSON	105
Fluxon propagation and DC current singularities in long Josephson junctions	
By R.D. PARMENTIER AND G. COSTABILE	117
Introduction to discrete systems	
By H. FLASCHKA AND D.W. MCLAUGHLIN	125
Nonlinearity and irreversibility in lattice dynamics	
By E. ATLEE JACKSON	127
Problems in nonlinear dynamics	
By MORIKAZU TODA	197
Those ubiquitous, but oft unstable, lattice solitons	
By C.F. DRISCOLL AND T.M. O'NEIL	211

The breakup of soliton like pulses on a nonlinear, nonuniform electrical lattice	
By RICHARD W. STEWART AND JAMES CORONES . . . . .	227
Some finite dimensional integrable systems	
By MARK ADLER . . . . .	237
On the solution of a functional equation	
By HELENE AIRAULT . . . . .	245
Introduction to waves in plasmas	
By H. FLASCHKA AND D.W. MCCLAUGHLIN . . . . .	253
Soliton-like structures in plasmas	
By G. J. MORALES AND Y. C. LEE . . . . .	257
Cylindrical and spherical solitons	
By STEPHEN MAXON . . . . .	269
Applications of the inverse scattering transform II: the three-wave resonant interaction	
By D. J. KAUP . . . . .	283
2- and 3-dimensional localization of random phase waves	
By KUNIOKI MIMA AND AKIRA HASEGAWA . . . . .	309
Circular polarized nonlinear Alfvén waves—a new type of nonlinear evolution in plasma physics	
By MIKI WADATI, HEIJI SANUKI, KIMIYAKI KONNO, AND YOSHI-HIKO ICHIKAWA . . . . .	323
Introduction to quantization and quantum field theory	
By H. FLASCHKA AND D.W. MCCLAUGHLIN . . . . .	333
Non-linear quantum field theory	
By BROSL HASSLACHER AND ANDRÉ NEVEU . . . . .	341
Exact classical solutions to the two-dimensional “sigma” model; an unusual application of inverse scattering techniques	
By DAVID K. CAMPBELL . . . . .	371
Quantization of nonlinear wave equations	
By CRAIG R. NOHL . . . . .	393
A brief history of the quantum soliton with new results on the quantization of the Toda lattice	
By BILL SUTHERLAND . . . . .	413
