**CONTENTS**

Factorizations of infinite soluble groups By BERNHARD AMBERG .....	1
Infinite groups with normality conditions or infinite subgroups By RICHARD E. PHILLIPS .....	19
Product integrals and continuity By J.A. CHATFIELD .....	31
St Venant's compatibility conditions and basic problems in elasticity By TSUAN WU TING .....	47
Induced representations of groups on Banach spaces By R.A. FONTENOT AND I. SCHOCHETMAN .....	53
Multi-parameter spectral measures, generalized resolvents, and functions of positive type By R. SHONKWILER .....	83
Existence-uniqueness for two-point boundary value problems for $n$ th order nonlinear differential equations By ALLAN C. PETERSON .....	103
Spiral functions and related classes with fixed second coefficient By H. SILVERMAN AND D.N. TELAGE .....	111
Sweeping measures from the polydisc to the torus By HOWARD LEWIS PENN .....	117
Hausdorff and $H$ -compact are not complimentary By D.E. CAMERON .....	123
Factorial Domains By CHIN-PI LU .....	125
Fixed-point theorems for mappings with non-convex domain and range By P. KUHFITIG .....	141
Modular transformations and generalizations of several formulae of Ramanujan By BRUCE C. BERNDT .....	147
