

THE ROCKY MOUNTAIN
JOURNAL OF MATHEMATICS

Volume 5

Winter 1975

Number 1

CONTENTS

Generalizations of the first axiom of countability By FRANK SIWIEC	1
Some remarks on kernels, recovery formulas and evolution equations By ROBERT CARROLL	61
Bounds for Riemann-Stieltjes integrals By PAUL R. BEESACK	75
Complete ergodicity, weak mixing and stacking methods By SARAH L.M. CHRISTIANSEN	79
On cells in Euclidean space that cannot be squeezed By ROBERT J. DAVERMAN	87
Some unsolved problems concerning countably compact spaces By PETER FLETCHER AND WILLIAM F. LINDGREN	95
Numerical approximation for 2m-th order differential systems via splines By JOHN GREGORY AND FRANKLIN RICHARDS	107
Structure inherent in a free groupoid By J.A.S. GROWNEY	117
On the equivalence of oscillation and the existence of infinitely many conjugate points By M.S. KEENER	125
Smoothness theorems for the principal curvatures and principal vectors of a hypersurface By DONALD H. SINGLEY	135
Separable algebras over Prufer domains By JOSEPH A. WEHLEN	145
