CONTENTS

Quotient categories and rings of quotient By CAROL L. WALKER AND ELBERT A. WALKER	513
Real representations of split metacyclic groups By LARRY C. GROVE	557
On inner derivations of Malcev algebras By WILLIAM H. DAVENPORT	565
Some weaker forms of countable compactness By M.K. SINGAL AND ASHA MATHUR	569
Indices of Lindelöf functions and their derivatives By AMY C. KING AND S.M. SHAH	579
Inclusion theorems and semiconservative FK spaces By A.K. SNYDER AND A. WILANSKY	595
Fields and projective planes: A category equivalence By LYNN E. GARNER	605
Dual and bidual locally convex spaces By G.C. CROFTS	611
On the degeneration of solutions of the abstract differential equation $\epsilon u'' + Au = 0$ By L.E. BOBISUD, LEO F. BORON AND JAMES CALVERT	619
The double centralizer property is categorical By R.S. CUNNINGHAM AND E.A. RUTTER, JR	627
Independent classes of semiprimal algebras By D. JAMES SAMUELSON	631
Uniqueness and continuous dependence criteria for the Navier-Stokes equations By L.E. PAYNE	641
A note on infinite series of isols By JUDITH GERSTING	661
A condition allowing the reduction of the genus of a Heegaard splitting By LLOYD G. ROELING	667
Index to Volume 2	671
