CONTENTS

Uniform finite generation of the rotation group By FRANKLIN LOWENTHAL	575
Fixed length confidence intervals for parameters of the normal distribution based on two-stage sampling procedures By L.H. KOOPMANS AND CLIFFORD QUALLS	587
Generalizations of midpoint rules By ROBERT E. BARNHILL	603
Some probabilistic remarks on Fermat's last theorem By P. ERDÖS AND S. ULAM	613
A note to the intersection of the powers of the Jacobson radical By MAX D. LARSEN AND AHMAD MIRBAGHERI	617
Uniform convergence of Fourier series on groups II By C.W. ONNEWEER	623
Real places and ordered fields By RON BROWN	633
Time decay and the Born series By WILLIAM G. FARIS	637
Properties of Pólya peaks By HERB SILVERMAN	649
Examples of modular annihilator algebras By BRUCE A. BARNES	657
Valuation rings with zero divisors By CHARLES H. BRASE	667
Large abelian subgroups of some infinite groups By VANCE FABER	677
Singular boundary problems for the differential equation $Lu = \lambda\sigma u$ By DAVID A. SHOTWELL	687
Boundary value problems for ordinary differential equations By LYNN ERBE	709
Index to Volume 1	731
