ROCKY MOUNTAIN JOURNAL OF MATHEMATICS

Volume 41 2011 Number 4

CONTENTS

Filiform nilsolitons of dimension 8
By Romina M. Arroyo 1025

When radical of primary submodules are prime submodules
By A. Azizi 1045

Odd-cycle-free facet complexes and the König property
By Massimo Caboara and Sara Faridi 1059

Characterizing minimal ring extensions
By Paul-Jean Cahen, David E. Dobbs and Thomas G. Lucas 1081

Nice bases and thickness in primary abelian groups
By Peter V. Danchev and Patrick W. Keef 1127

Boundary preservation by analytic maps between bordered Riemann surfaces
By Pisheng Ding 1151

Maps preserving unitary similarity on $\mathcal{B}(H)$
By Shuanping Du, Jinchuan Hou and Zhaofang Bai 1157

Solving a family of quartic Thue inequalities using continued fractions
By Andrej Dujella, Bernadin Ibrahimpašić and Borka Jadrijević 1173

Global bifurcation of nonnegative solutions for a quasilinear elliptic problem
By Peng Feng 1183

Isometries of Nakano space of vector valued functions
By Nadia J. Gal and James E. Jamison 1195

On lifting of idempotents in topological algebras
By Rodia I. Hadjigeorgiou 1221

Generalized bi-circular projections on spaces of operators and JB^* triples
By James Jamison 1241

CONTENTS CONTINUED ON LAST PAGE

Factorizations and representations of binary polynomial recurrences by matrix methods
By Emrah Kiliç and Pantelimon Stănică 1247

Boundary decomposition of the Bergman kernel
By Steven G. Krantz 1265

A Hamiltonian model and soliton phenomenon for a two-mode KdV equation
By Chun-Te Lee and Jinn-Liang Liu 1273

On the g-ary expansions of middle binomial coefficients and Catalan numbers
By Florian Luca and Igor E. Shparlinski 1291

Degree k linear recursions mod (p) and number fields
By T. Machenry and Kieh Wong 1303

Weyl groups, descent systems and Betti numbers
By Lex E. Renner 1329

Delocalized Betti numbers and Morse type inequalities
By Mostafa Esfahani Zadeh 1361

Some q-series identities related to the q-triplicate inverse
By Zhizheng Zhang and Na Li 1375
