ROCKY MOUNTAIN JOURNAL OF MATHEMATICS

Volume 49 2019 Number 4

CONTENTS

Identities for the zeros of entire functions of finite rank and spectral theory
By N. Anghel 1049

Functions analytic in the unit ball having bounded L-index in a direction
By Andriy Bandura and Oleh Skaskiv 1063

An explicit conductor formula for $\mathrm{GL}_n \times \mathrm{GL}_1$
By Andrew Corbett 1093

Unlabeled signed graph coloring
By Brian Davis 1111

Finite subgroups of the extended modular group
By Gregory Dresden, Prakriti Panthi, Anukriti Shrestha and Jiahao Zhang 1123

Essentially hyponormal weighted composition operators on the Hardy and weighted Bergman spaces
By Mahsa Fatehi 1129

Open book embeddings of closed non-orientable 3-manifolds
By Abhijeet Ghanwat, Suhas Pandit and Selvakumar A 1143

Multiple positive solutions for a (p, q)-Laplace equation involving singular and critical terms
By Liu-Tao Guo, Hong-Min Suo, Chang-Mu Chu and Chun-Yu Lei 1169

Solvability of the mixed problem of a high-order PDE with fractional time derivatives, Sturm-Liouville operators on spatial variables and non-local boundary conditions
By Onur Alp .Ilhan, Shakirbay G. Kasimov, Umrbek S. Madraximov and Haci M. Baskonus 1191

CONTENTS CONTINUED ON LAST PAGE

On k-restricted overpartitions
By Uha Isnaini 1207

The ascending chain condition on principal ideals in composite generalized power series rings
By Jung Wook Lim and Dong Yeol Oh 1223

Existence and uniqueness of solution for a nonhomogeneous discrete fractional initial value problem
By A. Khastan and H. Azadi 1237

Spectral triples for nonarchimedean local fields
By Slawomir Klimek, Sumedha Rathnayake and Kaoru Sakai .. 1259

The integer group determinants for the symmetric group of degree four
By Christopher Pinner 1293

Well-posedness of semilinear strongly damped wave equations with fractional diffusion operators and C^0 potentials on arbitrary bounded domains
By Joseph L. Shomberg 1307

Convexity with respect to weakly q-concave line bundles and reduction
By Viorel Vâjâitu 1335

Theory and analysis of partial differential equations with a ψ-Caputo fractional derivative
By D. Vivek, E.M. Elsayed and K. Kanagarajan 1355

Infinitely many sign-changing solutions for the Hardy-Sobolev-Maz'ya equation involving critical growth
By Lixia Wang 1371

Projective dimension and regularity of edge ideals of some weighted oriented graphs
By Guangjun Zhu, Li Xu, Hong Wang and Zhongming Tang 1391
