

ROCKY MOUNTAIN JOURNAL OF MATHEMATICS

Volume 50

2020

Number 3

Existence of periodic solutions for a class of neutral differential equations with impulses SUZETE M. AFONSO AND ANDRÉ L. FURTADO	763
Exact solutions of linear Riemann–Liouville fractional differential equations with impulses RAVI P. AGARWAL, SNEZHANA HRISTOVA AND DONAL O’REGAN	779
Uniformly nonlinear elliptic problems with obstacle LAHSEN AHAROUCHE	793
A generalization of parabolic Riesz and parabolic Bessel potentials ILHAM A. ALIEV AND ÇAĞLA SEKIN	815
Waring numbers for diagonal congruences ALA ALNASER, TODD COCHRANE, MISTY OSTERGAARD AND CRAIG SPENCER	825
The C-complex clasp number of links JONAH AMUNDSEN, ERIC ANDERSON, CHRISTOPHER WILLIAM DAVIS AND DANIEL GUYER	839
Weak Hadamard star configurations and apolarity IMAN BAHMANI JAFARLOO AND GABRIELE CALUSSI	851
On labeled graph C^* -algebras DEBENDRA P. BANJADE AND MENASSIE EPHREM	863
Existence of mild solutions for conformable fractional differential equations with nonlocal conditions MOHAMED BOUAOUID, KHALID HILAL AND SAID MELLIANI	871
Canonical threefold singularities with a torus action of complexity one and k -empty polytopes LUKAS BRAUN AND DANIEL HÄTTIG	881
A generalized Newton–Girard formula for monomial symmetric polynomials SAMUEL CHAMBERLIN AND AZADEH RAFIZADEH	941
Bi-amalgamation of rings defined by certain annihilator conditions ABDELHAQ EL KHALFI, NAJIB MAHDOU AND AZIZA RAHMOUNI HASSANI	947
Cover times for Markov-generated binary sequences of length two EVAN FISHER, TIANMAN HUANG AND XIAOSHI WANG	957
On the reduced second Zagreb index of graphs FANG GAO AND KEXIANG XU	975
Equivalent metrics on normal composition operators MOHAMMAD R. JABBARZADEH AND SEDDIGHE HAGHIGHATJOO	989

CONTENTS CONTINUED ON LAST PAGE

Relative bending energy for weakly prestrained shells SILVIA JIMÉNEZ BOLAÑOS AND ANNA ZEMLYANOVA	1001
Direct limits of adèle rings and their completions JAMES P. KELLY AND CHARLES L. SAMUELS	1021
Sums of weighted averages of gcd-sum functions, II ISAO KIUCHI AND SUMAIA SAAD EDDIN	1045
θ -triangle and ω -parallelogram pairs with areas and perimeters in certain proportions YANGCHENG LI AND YONG ZHANG	1059
Some new results for nonlinear fractional h -difference systems with “maxima” XIANG LIU, BAOGUO JIA AND PEIGUANG WANG	1073
The distance between two limit q -Bernstein operators SOFIYA OSTROVSKA AND MEHMET TURAN	1085
Closed neighborhood ideal of a graph LEILA SHARIFAN AND SOMAYEH MORADI	1097
A remark on entropies of noncompact systems DINGXUAN TANG AND ZHIMING LI	1109
Characterization and enumeration of palindromic numbers whose squares are also palindromic AMITABHA TRIPATHI	1115
Fujita exponent for an inhomogeneous pseudoparabolic equation JUN ZHOU	1125
