1995 MODERN LOGIC CALENDAR

The 1995 Modern Logic Calendar you can attempt to solve a Carrollian puzzle; ask with the biographer of Rózsa Péter “What does a mathematician has to do to get a decent job?”; learn some of the facts of Kurt Grelling’s unhappy life and tragic death; read what Kolmogorov thought of his famous paper “On the Principle of Excluded Middle”; consider whether Russell really thought that Gödel’s incompleteness theorem meant that “school-boy arithmetic” permitted that $2 + 2 = 4.001$; learn about the life and work of N.A. Vasil’ev, Djuro Kurepa, and Platon Sergeevich Poretskij; about how historian Viktor Viktorovich Bobynin; and read what Łukasiewicz considered to be “the sole axiom of propositional calculus.”
