Irving H. ANELLIS

W. S. ANGLIN & J. LAMBEK, *The Heritage of Thales* (New York/Berlin/Heidelberg/London/Paris/Tokyo, Springer-Verlag, 1995). A general expository, but incomplete, history of mathematics which gives consideration to several topics in the history of logic, including a proof of Gödel's incompleteness theorem(s) and a discussion of their implications and the elements of category theory.

Kirby A. BAKER, *Bjarni Jónsson's contributions in algebra*, Algebra Universalis 31 (1994), 306–336. A review of Jónsson's contributions to algebra, including his work on Boolean algebras and on relational structures for algebras.

J. L. BELL, *Type Reducing Correspondences and Well-orderings: Frege's and Zermelo's Constructions Re-examined*, Journal of Symbolic Logic 60 (1995),
