

Personal Notes

Author Notes

We are pleased to announce the publication of the new anthology, *Perspectives on the History of Mathematical Logic*, edited by Modern Logic co-editor Thomas DRUCKER, available from Birkhäuser Verlag. The collection contains studies of the contributions of logicians from Peirce to the present.

July 23, 1992 marks the 80th anniversary of birth of the late Jean van Heijenoort, logician, philosopher and historian of logic. Anita Burdman FEFERMAN has completed the manuscript for her book *Politics, Logic and Love: The Life of Jean van Heijenoort*, slated for publication by Jones and Bartlett (Boston) in the Spring of 1992. The work will also contain an appendix on "Jean van Heijenoort's Scholarly Work" by Solomon FEFERMAN.

Abstracts from Boris TRAKTENBROT's 70th Birthday Symposium, held at Tel-Aviv University on 10 – 13 June 1991 are available via anonymous ftp from <theory.lcs.mit.edu> (Internet address 18.52.0.92) in both L^AT_EX and Postscript format in the files trakh70.tex and trakh70.ps in the directory pub/meyer. They are also available by e-mail at <archive-server@theory.lcs.mit.edu> using either "send meyer trakh70.tex" or "send meyer trakh70.ps." in the request message. Additional files available include an on-line bibliography for the annual IEEE Symposium on Logic in Computer Science. An index of materials available can be obtained with the command "send meyer Index".

Meetings

III Симпозиум «Закономерности и современные тенденции развития математики». Обнинск. 25 - 27.05.89

Обзор составил В.Э. Войцехович
(20.VI. 1990)

Симпозиум организован Центральным советом философских (методологических) семинаров при Президиуме АН СССР, ФО
