Carl N. Morris, 1989–1991

Robert E. Kass, 1992–1994

Morris Eaton, 2001–2002

Paul Switzer, 1995–1997

Leon J. Gleser, 1998–2000

Richard Tweedie, 2001

The aim of *Statistical Science* is to present the full range of contemporary statistical thought at a technical level accessible to the broad community of practitioners, teachers, researchers and students of statistics and probability.

The journal will publish discussions of methodological and theoretical topics of current interest and importance, surveys of substantive research areas with promising statistical applications, comprehensive book reviews, discussions of classic articles from the statistical literature and interviews with distinguished statisticians and probabilists.

The opinions expressed are those of the authors and do not necessarily reflect those of the editors or of the IMS.

SUBMISSION POLICY

Statistical Science welcomes the submission of expository, review and survey papers in all areas of the theory, methodology and applications of statistics and probability. Articles that synthesize research that has been published in diverse sources or that has been developed from diverse points of view are especially valuable. Please see the editorial in the February 1992 issue (vol. 7, no. 1) for additional description of the goals of *Statistical Science*.

Authors should submit four nonreturnable copies of any manuscript to be considered for publication in *Statistical Science*. The manuscript should be typed on $8\frac{1}{2} \times 11$ -inch white paper, on one side only, and double-spaced throughout, including the references, with margins of at least $1\frac{1}{2}$ inches on all four sides. Pages should be numbered consecutively. The manuscript should contain an abstract of 200 or fewer words, followed by approximately 5 or 6 key words or phrases. A short author's note providing the name, address, present position or rank and affiliation of each author should also be included. Additional guidelines for authors appear in the November 1994 issue. Copies should be mailed, first class, to:

George Casella
Executive Editor, *Statistical Science*
University of Florida
Department of Statistics
Griffin-Floyd Hall, P.O. Box 118545
Gainesville, Florida 32611-8545

In addition, if possible, a \LaTeX file should be sent by e-mail to statsci@stat.ufl.edu. If e-mail is not feasible, a standard floppy disk may be submitted by first-class mail. Manuscripts submitted in \LaTeX should use the "article" style.

A condition of submission is that the manuscript has not previously been published and is not simultaneously being considered for publication elsewhere. All authors must transfer copyright to the Institute prior to publication. Page charges are \$45 per printed page. Payment of some or all of the estimated page charges associated with articles is strongly encouraged. The editorial review of articles and administration of page charges are completely separate activities. Manuscripts are reviewed and accepted prior to determining whether page charges will be paid. Corresponding authors receive 25 gratis offprints. Offprints of discussion articles include the main article(s), discussion(s) and rejoinder(s) as a package. Corresponding authors of main articles receive 25 gratis offprints; corresponding discussants receive 10 gratis offprints. Additional offprints may be purchased by using the IMS Offprint Purchase Order Form accompanying the galley. Copyright transfer, page charges and offprints are the responsibility of the IMS Business Manager.
