The
Annual Index
to the
Statistical Literature of the World

CURRENT INDEX TO STATISTICS APPLICATIONS, METHODS AND THEORY VOLUME 14 (1988)--NOW AVAILABLE

- More than 9,900 articles from "core" and "related" journals and books indexed for 1988.
- Complete coverage of 86 core journals in statistics, probability, and related fields.
- Articles selected and indexed from many other journals.
- Subject index lists each article alphabetically according to each *important word* in its title.
- Subject index also lists articles alphabetically according to *key words* not appearing in the title.
- Author index lists each article under the name of each author.
- Reasonable prices:

Volumes 1-15
IMS/ASA Members $18
Nonmember individuals . . $25
Nonmember institutions . . $54

Published jointly by the Institute of Mathematical Statistics and the American Statistical Association. Volumes 1-14 are available now at the above prices. Publication of Volume 15 (1989) is expected late in 1990. Orders for Volume 15 are now being accepted at the above prices, with shipping upon availability. Please specify applicable rate and volume number(s) desired. Order prepaid from:

Institute of Mathematical Statistics
3401 Investment Boulevard, Suite 7
Hayward, California 94545 (USA)

CBMS Regional Conference Series
in Probability and Statistics
Volume 1

GROUP INVARIANCE APPLICATIONS IN STATISTICS

Morris L. Eaton
University of Minnesota

Sponsored by the
Conference Board of the Mathematical Sciences
Supported by the
National Science Foundation
Published by the
Institute of Mathematical Statistics
and the
American Statistical Association

These lecture notes result from the CBMS/NSF Regional Conference held at the University of Michigan in June 1987. Topics in invariance with applications in statistics are discussed in nine chapters—including integrals and the Haar measure, group actions and relatively invariant integrals, invariant statistical methods, models invariant under compact groups, decomposable measures, invariant decision problems, random orthogonal matrices, finite deFinetti style theorems, and finite deFinetti style theorems for linear models.

The Institute of Mathematical Statistics and the American Statistical Association are proud to announce the publication of this new *Series*. The volumes in this *Series* are based on the CBMS/NSF regional research conferences and join SIAM's *CBMS Series in Applied Mathematics* and AMS's *CBMS Series in Mathematics*. Volume 1 will be available late in 1989 with one volume expected per year thereafter.

List Price $25

IMS/ASA/CBMS Member Price $15

Institutional standing orders to this *Series* provide for advance notification of publication dates for each volume and access to *prepublication discounts* of 20%. **Members of IMS, ASA, and CBMS societies receive a 40% discount.** Prepaid orders for individual volumes and requests for standing order enrollment should be sent to:

Institute of Mathematical Statistics
3401 Investment Boulevard, Suite 7
Hayward, California 94545 (USA)

IMS Lecture Notes–Monograph Series

This series provides an avenue for the rapid, but carefully refereed, publication of important research results in comprehensive form and expository style. These volumes should be of great value to researchers and advanced students in statistics, probability, and related fields. The series editor is Robert J. Serfling, Johns Hopkins University.

---

9 FUNDAMENTALS OF STATISTICAL EXPONENTIAL FAMILIES

by Lawrence D. Brown

A systematic treatment of the analytical and probabilistic properties of exponential families.

Many if not most of the successful mathematical formulations of statistical questions involve specific exponential families of distributions. This volume examines these mathematical formulations from the perspective of general exponential families with a variety of statistical applications in mind.

283 pages
List price $25
IMS members $15

10 DIFFERENTIAL GEOMETRY IN STATISTICAL INFERENCE

by S.-I. Amari, O. E. Barndorff-Nielsen, R. E. Kass, S. L. Lauritzen, and C. R. Rao

A concise yet comprehensive presentation of research on differential geometry in statistics.

The papers in this volume were originally presented at the NATO Advanced Workshop on Differential Geometry in Statistical Inference at Imperial College in April 1984. They summarize recent research which has substantially extended both the applicability of differential geometry and our understanding of the role it plays in statistical theory.

244 pages
List price $25
IMS members $15

11 GROUP REPRESENTATIONS IN PROBABILITY AND STATISTICS

by Persi Diaconis

An expanded version of lecture notes delivered over the past eight years at Harvard, Stanford, and Ohio State Universities.

This monograph delves into the uses of group theory, particularly non-commutative Fourier analysis, in probability and statistics. It presents useful tools for applied problems and develops familiarity with one of the most active areas in modern mathematics.

204 pages
List price $30
IMS members $18

& ADDITIONAL TITLES

Volume 1, *Essays on the Prediction Process* by Frank Knight ($15/members $9); Volume 2, *Survival Analysis* edited by John Crowley and Richard A. Johnson ($25/members $15); Volume 3, *Empirical Processes* by Peter Gaenssler ($20/members $12); Volume 4, *Zonal Polynomials* by Akimichi Takemura ($15/members $9); Volume 5, *Inequalities in Statistics and Probability* edited by Y. L. Tong ($25/members $15); Volume 6, *The Likelihood Principle* (2nd edition) by James Berger and Robert Wolpert ($25/members $15); Volume 7, *Approximate Computation of Expectations* by Charles Stein ($20/members $12); Volume 8, *Adaptive Statistical Procedures and Related Topics* edited by John Van Ryzin ($40/members $24).

Prepaid orders for individual volumes and requests for standing order enrollment (eligible for 20% prepublication discounts from list prices) should be sent to:

Institute of Mathematical Statistics
3401 Investment Boulevard, Suite 7
Hayward, California 94545 (USA)

CALL FOR PAPERS

THE ANNALS OF APPLIED PROBABILITY
Volume 1, Number 1, February 1991

The Institute of Mathematical Statistics will publish the first issue of its new journal, *The Annals of Applied Probability,* in February 1991.

In addition to welcoming papers in all the traditional areas of applied probability, the new *Annals* particularly hopes to attract work that develops and deepens the interplay of probability and other fields, including computer science, finance, network modeling, and biology.

Submissions are now being considered for publication and should be directed to:

J. Michael Steele, *Editor*
School of Engineering and Applied Science
E-220 Engineering Quadrangle
Princeton University
Princeton, NJ 08544 (USA)

Four copies should be submitted and authors are requested to follow the instructions which appear at the front of each issue of *The Annals of Probability* or *The Annals of Statistics.*

INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

The purpose of the Institute is to foster the development and dissemination of the theory and applications of statistics and probability.

OFFICERS AND EDITORS

President:
Shanti S. Gupta, Department of Statistics, Purdue University, West Lafayette, Indiana 47907

President-Elect:
David O. Siegmund, Department of Statistics, Sequoia Hall, Stanford University, Stanford, California 94305

Past President:
Ram Gnanadesikan, Morris Research and Engineering Center, Bell Communications Research, 435 South Street, Morristown, New Jersey 07960-1961

Executive Secretary:
Peter Purdue, Department of Operations Research, Code 55, Naval Postgraduate School, Monterey, California 93943

Treasurer:
Jessica Utts, Division of Statistics, University of California, Davis. *Please send correspondence to*: IMS Business Office, 3401 Investment Boulevard #7, Hayward, California 94545

Program Secretary:

Paul Shaman, Department of Statistics, University of Pennsylvania, Philadelphia, Pennsylvania 19104-6302

Journals. The scientific journals of the Institute are *The Annals of Statistics*, *The Annals of Probability*, and *Statistical Science*. The news organ of the Institute is *The Institute of Mathematical Statistics Bulletin*.

Individual and Organizational Memberships. All *individual members* receive *The IMS Bulletin* for basic membership dues of $30. Each regular member must elect to receive at least one scientific journal for an additional amount, as follows: *Statistical Science* ($5), one *Annals* ($15) or two *Annals* ($25). Dues allocations to each journal are set by Council resolution. Of the total dues paid, $12 is allocated to *The IMS Bulletin* and the remaining amount is allocated equally among the scientific journal(s) received. Reduced membership dues are available to full-time students, permanent residents of countries designated by the IMS Council, and retired members. Retired members may elect to receive the *Bulletin* only for $12. *Organizational memberships* are available to nonprofit organizations at $270 per year and for-profit organizations at $585 per year. Organizational memberships include two multiple-readership copies of all IMS journals in addition to other benefits specified for each category (details available from the IMS Business Office).

Individual and General Subscriptions. Subscriptions are available on a calendar-year basis. *Individual subscriptions* are for the personal use of the subscriber and must be in the name of, paid directly by, and mailed to an individual. Individual subscriptions for 1990 are available to both *Annals* and *Statistical Science* ($96), one *Annals* and *Statistical Science* ($60), both *Annals* ($72), one *Annals* ($45), *Statistical Science* ($30), and *The IMS Bulletin* ($20). *General subscriptions* are for libraries, institutions, and any multiple-readership use. General subscriptions for 1990 are available to both *Annals* and *Statistical Science* ($180), one *Annals* and *Statistical Science* ($105), both *Annals* ($145), one *Annals* ($90), *Statistical Science* ($45), and *The IMS Bulletin* ($30). Air mail rates for overseas delivery are $50 per title.

Permissions policy. Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Institute of Mathematical Statistics, provided that the base fee of $7.50 per copy, plus $.00 per page is paid directly to the Copyright Clearance Center, 27 Congress Street, Salem, Massachusetts 01970. For those organizations that have been granted a photocopy license by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is 0883-4237/90 $7.50 + .00.

Correspondence. Mail to IMS should be sent to the IMS Business Office (membership, subscriptions, claims, copyright permissions, advertising, back issues), the Editor of the appropriate journal (submissions, editorial content) or the Production Editor, Patrick Kelly, Department of Statistics, University of Pennsylvania, Philadelphia, Pennsylvania 19104-6302.

Smoothing Techniques in Theory

With Implementation in S

Provides a non-technical introduction into the area of non-parametric density and regression function estimation. The application of these methods is discussed in terms of the S computing environment. The averaging of data points in a prescribed neighborhood, a principal feature of smoothing, is not really practical in dimensions greater than three if there are only one hundred data points. Additive models provide a way out of this dilemma, but, for their interactiveness and recursiveness, they require highly effective algorithms. For this reason, the method of WARPing (Weighted Averaging Using Rounded Points) is described in great detail. The book is addressed to both the theoretical and applied statistician and can be used as an undergraduate text.

Asymptotics in Statistics

Some Basic Concepts

This book grew out of lectures given over a period of about 30 to 35 years on Asymptotic Methods in statistics. It presents, in a unified form, some results acquired over the past twenty years in the field of asymptotic statistical inference. The methods can be used very widely and emphasize approximation by Gaussian families of measure, as well as quadratic expansions of log likelihood. The basic theorems are presented at a level that can be understood by a beginning graduate student.

Asymptotic Methods in Statistical Decision Theory

"One of the main principles of the present book is to organize the large field of asymptotic statistical theory around a few essential ideas and elements ...The exposition of the whole subject is such that any one who wants to enter it needs to read only this book. Everything has been developed in detail, advanced techniques are fully explained, and results from classical analysis that are used in the text are collected in an extensive appendix."

Non-linear Estimation

Non-linear Estimation is a handbook for the practical statistician or modeller interested in fitting and interpreting non-linear models with the aid of a computer. A major theme of the book is the use of 'stable parameter systems'; these provide rapid convergence of optimization algorithms, more reliable dispersion matrices and confidence regions for parameters, and easier comparison of rival models. Insights into why some models are difficult to fit, how to combine fits over different data sets, how to improve data collection to reduce prediction variance, and how to program particular models to handle a full range of data sets are provided. The book combines an algebraic, a geometric and a computational approach and is illustrated with practical examples. A final chapter shows how this approach is implemented in the author's Maximum Likelihood Program, MLP.

Probability Approximations via the Poisson Clumping Heuristic

"The exposition is friendly, informal, and concise. The author's scholarship is generally excellent. His examples cover a broad spectrum of mathematical and applied probability; and his discussion of references is helpful for further study. In summary, the book is both fun to read and extraordinarily informative. I enthusiastically recommend it."
