

# IMS LECTURE NOTES — MONOGRAPH SERIES

This series provides an avenue for the rapid, but carefully refereed, publication of important research results in comprehensive form and expository style. These volumes should be of great value to researchers and advanced students in statistics, probability, and related fields. The series editor is Shanti S. Gupta, Purdue University.

## 7 APPROXIMATE COMPUTATION OF EXPECTATIONS

by Charles Stein

An abstract approach to the approximate computation of expectations.

One aim of the theory of probability is the effective computation of probabilities that are given in principle.

This volume presents an abstract approach to this issue keeping in mind the interaction of theoretical ideas and concrete problems.

## 8 ADAPTIVE STATISTICAL PROCEDURES AND RELATED TOPICS

edited by John Van Ryzin

Proceedings of the Symposium on Adaptive Statistical Procedures and Related Topics, Brookhaven National Laboratory, June 1985.

This symposium was held in honor of the 70th birthday of Herbert Robbins and covers the broad range of topics to which he has made fundamental contributions including stochastic approximation, empirical Bayes and sequential analysis. This volume contains 36 papers (five in abstract form) by students and/or colleagues of Robbins.

## 9 FUNDAMENTALS OF STATISTICAL EXPONENTIAL FAMILIES WITH APPLICATIONS IN STATISTICAL DECISION THEORY

by Lawrence D. Brown

A systematic treatment of the analytical and probabilistic properties of exponential families.

Many if not most of the successful mathematical formulations of statistical questions involve specific exponential families of distributions. This volume examines these mathematical formulations from the perspective of general exponential families with a variety of statistical applications in mind.

## CALL FOR PAPERS

### ENVIRONMETRICS 87: A Conference on Statistical and Mathematical Methodologies Applied to Problems in Environmental Quality Washington, D.C. ● November 15-18, 1987

Plans call for ENVIRONMETRICS 87 to feature contributed and invited sessions. The conference, which is modelled after the previous conference, ENVIRONMETRICS 81, will emphasize innovative applications of statistics and mathematics to environmental problems, stressing either new methodologies or significant applications of existing techniques. Topics for ENVIRONMETRICS 87 will include

acid rain	air quality	asbestos
exposure assessment	health effects	noise
ozone	pesticides	radiation
radon	risk analysis	solid waste
toxic substances	toxicological testing	monitoring and
transportation and disposal of toxic substances	water quality	measurement error

#### Contributed Papers

Contributed papers will be allocated 15 minutes for presentation. To submit a contributed paper for presentation at ENVIRONMETRICS 87, the author(s) should first request an abstract form from the ASA office, whose address is given below. A self-addressed, stamped envelope should be included with the request. Two copies of the abstract should then be sent to the ASA office no later than August 10, 1987. Abstracts will be reviewed by the Program Committee, with notification to the authors thereafter.

ENVIRONMETRICS 87 is sponsored by

**Individual, Institutional, and Corporate Memberships.** All *individual members* receive *Statistical Science* and *The IMS Bulletin* for a basic annual dues rate of \$30. Individual members may elect to receive one *Annals* for an additional \$10 or both *Annals* for an additional \$20. Dues allocations to each journal are set by Council resolution. Of the total dues paid, \$8 is allocated to *The IMS Bulletin* and the remaining amount is allocated equally among the scientific journals received. Retired members may also elect to receive the *Bulletin* only for \$10. *Institutional memberships* are available to nonprofit organizations at \$230 per year and *corporate memberships* are available to other organizations at \$500 per year. Institutional and corporate memberships include two multiple-readership copies of all IMS journals in addition to other benefits specified for each category (details available from the IMS Business Office).

**Individual and General Subscriptions.** Subscriptions are available on a calendar-year basis. For 1987, all subscriptions to one or both *Annals* automatically include one subscription to *Statistical Science*. *Individual subscriptions* are for the personal use of the subscriber and must be in the name of, paid directly by, and mailed to an individual. Individual subscriptions for 1987 are available to both *Annals* and *Statistical Science* (\$79), one *Annals* and *Statistical Science* (\$52), *Statistical Science* only (\$25), and *The IMS Bulletin* (\$15). *General subscriptions* are for libraries, institutions, and any multiple-readership use.
