

SUT JOURNAL OF MATHEMATICS

Volume 53, Number 1

2017

CONTENTS

Kensaku Kitada:

The existence of universal flat topological connections with discrete structure group 1

Kazuhiro Oeda:

Steady-state solutions of a diffusive prey-predator model with finitely many protection zones 19

Silvestru Sever Dragomir:

Inequalities for quadratic operator perspective of convex functions and bounded linear operators on Hilbert spaces 39

Yasunori Fujikoshi:

High-dimensional properties of AIC, BIC and C_p for estimation of dimensionality in canonical correlation analysis 59

Masanari Kida and Yusuke Sudo:

On two-dimensional Galois representations with squarefree conductor .. 73
