

CONTENTS

Makoto Takahashi: Representations of normalizer subgroups of maximal tori of the classical group of type C .....	1
Yuuki Tadokoro: A nontrivial algebraic cycle in the Jacobian variety of the Fermat sextic .....	29
U-Hang Ki, Hiroyuki Kurihara and Ryoichi Takagi: Jacobi operators along the structure flow on real hypersurfaces in a nonflat complex space form.....	39
Tomohiro Kamiyoshi: A characterization of finite prehomogeneous vector spaces of $D_4$ -type under various scalar restrictions .....	57
Akira Kamibeppu: Subcomplexes of box complexes of graphs.....	79
Shingo Ibuka, Hirotaka Kikyo, and Hiroshi Tanaka: Quantifier elimination for lexicographic products of ordered abelian groups.....	95
Takefumi Igarashi and Noriaki Umeda: Nonexistence of global solutions in time for reaction-diffusion systems with inhomogeneous terms in cones.....	131
Shinetsu Tamura and Nobuhiro Innami: Circular billiards and parallel axiom in convex billiards .....	147
Hisashi Kojima: The lifting of elliptic modular forms to Hilbert modular forms and Petersson inner products .....	161
Masaya Ouchi: A classification of reductive prehomogeneous vector spaces with trivial representation free .....	177
Jun-ichi Matsuzawa and Makoto Takahashi: Representations of the normalizers of maximal tori of simple Lie groups.....	189
Chiaki Tsukamoto: Stability in $SO(n+3)/SO(3) \times SO(n)$ branching .....	239
Kazuo Takemura, Hiroyuki Yamagishi, Yoshinori Kametaka, Kohtaro Watanabe and Atsushi Nagai: The best constant of Sobolev inequality corresponding to a bending problem of a beam on an interval ..	253
Yuriko Gorai, Hiroyuki Tasaki, and Mio Yamakawa: Convergence rates of approximate sums of the areas of surfaces of revolution .....	281
Aleksander Grytczuk and Izabela Kurzydło: On some matrix Diophantine equations.....	299
Absos Ali Shaikh, Dae Won Yoon and Shyamal Kumar Hui: On quasi-Einstein spacetimes .....	305
