

**CONTENTS**

Tetsuya Hosaka: On boundaries of coxeter groups and topological fractal structures.....	153
Sorin Dragomir and Andrea Tommasoli: On $p$ -harmonic maps into spheres.....	161
Chuan Liu and Yoshio Tanaka: Metrizable of ordered additive groups ...	169
Fatima Zohra Mezeghrani: Necessary and sufficient conditions for the solvability and maximal regularity of abstract differential equations of mixed type in UMD spaces.....	185
Kota Takeuchi: A generalization of Shelah's omitting types theorem .....	203
Makoto Sakaki: Lorentzian stationary surfaces in 4-dimensional space forms of index 2.....	215
Keiju Sono: A second limit formula for higher rank twisted Epstein zeta functions and some applications.....	231
Gen-ichi Oshikiri: On killing fields preserving minimal foliations of polynomial growth at most 2.....	253
Alberto Favaron and Angelo Favini: Fractional powers and interpolation theory for multivalued linear operators and applications to degenerate differential equations .....	259
