

CONTENTS

Katsuya Eda: Limit systems and the chain condition .....	147
Katsuya Eda: A note on the hereditary properties in the product space ..	157
Miguel Ferrero: On generalized convolution rings of arithmetic functions ..	161
Zvonko Čerin: On various relative proper homotopy groups .....	177
Masahisa Sato: Codivisible modules, weakly-codivisible modules and strongly $\eta$ -projective modules .....	203
Takemi Mizokami: Dimension of special $\mu$ -spaces .....	221
Yasushi Aoki: Orthocompactness of inverse limits and products .....	241
Masazumi Hanazawa: On a classification of Aroszajn trees .....	257
Masaaki Homma: On projective normality and defining equations of a projective curve of genus three embedded by a complete linear system .....	269
Kazunori Sakano: Injective dimension of generalized triangular matrix rings .....	281
Mitsuhiro Itoh: Some geometrical aspects of Riemannian manifolds with a pole .....	291
Hisao Yoshihara: Structure of complex tori with the automorphisms of maximal degree .....	303
Akira Koyama: A note on some strong Whitney-reversible properties.....	313
Jiryō Komeda: First order deformations of cones over projectively normal hyperelliptic curves .....	317
Kunio Murasugi: On symmetry of knots .....	331
Jun Morita: Roots of Kac-Moody Lie algebras .....	349
