

CONTENTS

Jun Morita: Coverings of generalized Chevalley groups associated with affine Lie algebras	1
Takemi Mizokami: On the adjunction spaces of free L -spaces and M_1 -spaces	9
Katsuro Sakai: Homeomorphisms of infinite-dimensional fibre bundles	21
Nobuhiro Innami: A note on symmetry of perpendicularity in a G -space with nonpositive curvature.....	35
Koichi Shiga: On a relation between the total curvature and the measure of rays	41
Takao Hoshina: Spaces with a property related to uniformly local finiteness.....	51
Kazuhiko Hirata: On trivial extensions which are quasi-Frobenius ones.....	63
Atsushi Seyama: On the curves of genus g with automorphisms of prime order $2g+1$	67
Hirohiko Shima: A differential geometric characterization of homogeneous self-dual cones	79
Yuko Homma: On projective Cohen-Macaulayness of a Del Pezzo surface embedded by a complete linear system	89
Nariaki Sugiura and Masahiro Fujimoto: Asymptotic risk comparison of improved estimators for normal covariance matrix	103
Hiroshi Shigano: On observable and strongly observable Hopf ideals	127
