

CONTENTS

Yoshihiro Shibata: On the global existence of classical solutions of second order fully nonlinear hyperbolic equations with first order dissipation in the exterior domain.....	1
Tadashi Tsuji: On connection algebras of homogeneous convex cones	69
Akio Kodama and Hirohiko Shima: Characterizations of homogeneous bounded domains	79
Daniel Simson: Indecomposable module over one-side serial local rings and right pure semisimple <i>PI</i> -rings.....	87
H. Busemann and B.B. Phadke: Peakless and monotone functions on <i>G</i> -spaces.....	105
Mitsuaki Kakimi and Toshio Yagi: On function spaces for general topological spaces	137
Ryozo Yokoyama: The convergence of moments in the central limit theorem for weakly dependent random variables.....	147
Katsuya Eda: A minimal flabby sheaf and an abelian group	157
Tsuyoshi Yukami: A theorem on lengths of proof of Presburger formulas	169
Tamotsu Ikeyama: Localizations with respect to non-hereditary torsion theories	185
Roman Kiełpiński: Polynomial type Hopf algebras	191
Masaru Takeuchi: Correction to "On conjugate loci and cut loci of compact symmetric spaces I"	203
