

**CONTENTS**

|   |     |
|---|-----|
| Mitsuhiro Itoh: Selfdual Yang-Mills equations and Taubes' theorem .....                                   | 1   |
| Martin A. Magid: Isometric immersions of Lorentz spaces with parallel<br>second fundamental forms .....   | 31  |
| Minoru Koike: On the microlocal hypoellipticity of pseudodifferential<br>operators .....                  | 55  |
| Akira Okabe: On conductor overrings of an integral domain.....  | 69  |
| Munehiko Itō: $M_0$ spaces, are $\mu$ -spaces .....   | 77  |
| Sibe Mardešić: On resolutions for pairs of spaces .....   | 81  |
| Katsuya Eda: $Z$ -kernel groups of measurable cardinalities .....   | 95  |
| Katsuro Sakai: On $R^\infty$ -manifolds and $Q^\infty$ -manifolds, II: Infinite deficiency ...            | 101 |
| Takaaki Shiraishi: An asymptotic expansion for a onesided rank test<br>in two way layout.....             | 119 |
| Akira Okabe: On conductor overrings of valuation domain.....  | 125 |
| Sabrō Uchiyama: Solution of a Diophantine problem .....   | 131 |
| Tatsuhiko Yagasaki: The approximate section extension property and<br>hereditary shape equivalences ..... | 159 |
| Koichi Ogiue and Ryoichi Takagi: A submanifold which contains many<br>extrinsic circles .....             | 171 |
| P. R. Colby and K. R. Fuller: $QF\text{-}3'$ rings and Morita duality .....                               | 183 |
| Shoji Ohmori and Masaaki Homma: On the weight of higher order<br>Weierstrass points.....                  | 189 |
