

CONTENTS

Ibrahim Assem and Yasuo Iwanaga: On a class of representation-finite QF-3 algebras.....	199
Takemi Mizokami: On closed images of perfect preimages of orthocompact developable spaces.....	219
Toshiyasu Arai: A consistency proof as system including Feferman's ID_ϵ by Takeuti's reduction method.....	227
Hirokazu Iwashita: Spectral theory for symmetric systems in an exterior domain.....	241
Hiroshi Mikawa: The differences between consecutive almost-primes.....	257
Masumi Kameda: Non-negatively curved C-totally real submanifolds in a Sasakian manifold.....	265
Mamoru Nunokawa: On the theory of multivalent functions.....	273
Izumi Kuribayashi and Fumiyuki Momose: On the action of automorphisms of a curve on the first l -adic cohomology.....	287
Tadashi Watanabe: Approximative shape, II—generalized ANRs—.....	303
Kenji Nagasaka and Jau-Shyong Shiue: Benford's law for linear recurrence sequences.....	341
Katsuya Eda and Yoshihiro Abe: Compact cardinals and abelian groups...	353
Fumiko Ohtsuka: Complete 2-transnormal hypersurfaces in a Kaehler manifold of negative constant holomorphic sectional curvature.....	361
Zhi min Gao and Yasunao Hattori: A characterization of closed s -images of metric spaces.....	367
Shoji Kyuno and Nobuo Nobusawa and Mi-Soo B. Smith: Regular gamma rings.....	371
Mitsuo Hoshino and Jun-ichi Miyachi: Tame triangular matrix algebras over self-injective algebras.....	383
Juhani Nieminen: Graphs and finite distributive partial lattices.....	393
U-Hang Ki and Hisao Nakagawa: Reduction of the codimension of totally real submanifolds of a complex space form.....	399
