

CONTENTS

Tadashi Watanabe: Approximative shape,  $IV-UV^n$ -maps and the Vietoris-Smale theorem ..... 273

Mariko Yasugi: An interpretation of intuitionistic analysis with restricted transfinite inductive definitions..... 321

Kazuhiro Kawamura: On span and inverse limits ..... 333

Akira Ohbuchi: A note on the projective normality of special line bundles on aberian varieties ..... 341

Takahiro Motai: On the cauchy problem for the nonlinear Klein-Gordon equation with a cubic convolution ..... 353

Don Redmond and R. Sitaramachandra Rao and R. Sivaramakishnan: On dedekind sums and analogs ..... 371

Hiroshi Okuno: Iterated tilted algebras induced from coverings of trivial extensions of hereditary algebras ..... 391

P. Bueken and L. Vanhecke: Geometry and symmetry on sasakian manifolds ..... 403

Ahmad Zandi: Minimal immersions of surfaces in quaternionic projective spaces ..... 423

R.R. Colby: Tilting modules, domonant dimension and exactness of duality functors ..... 441

He-Jin Kim: A note on real hypersurfaces of a complex hyperbolic space .... 451

Kenji Nishida: A characterization of Gorenstein orders ..... 459

Yasuo Nakanishi: On helices and pseudo-Riemannian submanifolds..... 469

Yasushi Ishikawa: Remarks on transmission, antitransmission and antilocal properties for sums stable generators ..... 477

Takashi Kimura: Homeomorphisms of zero-dimensional spaces..... 489

Takehiro Ito: Isotropic minimal submanifolds in a space form ..... 497

Akira Ohbuchi: Some criteria for reducible aberian varieties ..... 507

Kazuhiro Kawamura: A direct proof that each Peano continuum with a free arc admits no expansive homeomorphisms ..... 521
