

**CONTENTS**

Liu Hui-Li: Minimal immersions of pseudo-Riemannian Manifolds .....	1
Hong Oh Kim and Yeon Yong Park: Maximal functions of plurisubharmonic functions .....	11
G. Karpilovsky: The Jacobson radical of monoid-graded algebras .....	19
Kyung Chan Min and Seok Jong Lee: Fibrewise convergence and exponential laws.....	53
Shōji Ochiai: On a topological invariant of finite topological spaces and enumerations .....	63
Nikica Uglešić and Vlasta Matijević: An approximate resolution of the product with a compact factor.....	75
Y. Kurata and K. Hashimoto: Note on dual-bimodules.....	85
Hisaaki Fujita and Hiroshi Yoshimura: A criterion for isomorphic tiled orders over a local Dedekind domain .....	107
Shoulian Yang: On the absolutely paracompact subsets of $\nabla^{\omega}(\omega+1)$ .....	113
S.D. Iliadis: Universal spaces for some families of rim-scattered spaces ..	123
Makoto Sakaki: Exceptional minimal surfaces with the Ricci condition ..	161
Tohru Gotoh: A remark on foliations on a complex projective space with complex leaves .....	169
Naonori Ishii: Coverings over $d$ -gonal curves .....	173
Hiroki Manabe: Pluriharmonic maps into principal fiber bundle and vertical torsion .....	191
V. Tzannes: Two Moore spaces on which every continuous real-valued function is constant .....	203
Mamoru Nunokawa and Shinichi Hoshino: On some starlikeness conditions for analytic functions .....	211
Michiharu Suzuki: Hypoellipticity for a class of degenerate elliptic operators of second order .....	217
Akio Baba: The $L_2$ -wellposed Cauchy problem for Schrödinger type equations .....	235
Hiroo Matsuda: Homogeneous Lorentz manifolds with isotropy subgroup $U(2)$ or $SO(2)$ .....	257
Sōhei Nozawa: Sharp characters of finite groups having prescribed values	269
