

CONTENTS

Akira Koyama and Katsuya Yokoi: A unified approach of characterizations and resolutions for cohomological dimension modulo p 247

Senjo Shimizu: Eigenfunction expansions for elastic wave propagation problems in stratified media R^3 283

Mishio Kawashita: Another proof of the representation formula of the scattering kernel for the elastic wave equation..... 351

Wakako Dan: On the Neumann problem of linear hyperbolic parabolic coupled systems 371

Wakako Dan: On the Neumann problem for some linear hyperbolic-parabolic coupled systems with coefficients in Sobolev spaces..... 411

Fumiko Ohtsuka: Rigidity of compact ideal boundaries of manifolds joined by Hausdorff approximations..... 439

Naotsugu Chinen: A relation between k -th UV^{k+1} groups and k -th strong shape groups 449

Kenrou Adachi and Hiromichi Matsunaga: On the moduli of periodic instantons..... 459

Tadashi Taniguchi: Characterizations of real hypersurfaces of a complex hyperbolic space in terms of Ricci tensor and holomorphic distribution 469

Yong-Soo Pyo: On real hypersurfaces of type A in a complex space form (I)..... 483

Soon Meen Choi: 3-dimensional space-like submanifolds with parallel mean curvature vector of an indefinite space form II..... 493

Harold R. Bennett and Masami Hosobuchi: Quasi- G_2 -diagonals and weak σ -spaces in GO-spaces 497

Boa-Lin Guo: Function spaces which are stratifiable 505
