

CONTENTS

Kaoru Yamaguti: On global quasi-analytic solutions of the degenerate Kirchhoff equation 541

Hong-Yu Wang: Morse theory and non-minimal solutions to the Yang-Mills equations 567

Satoshi Gomyo: Realization of maximal subgroups of rank 8 of the simply connected compact simple Lie group of type E_8 595

Haruhisa Ishida: On uniform well-posedness of the abstract Cauchy problem 617

Takayuki Kobayashi: On a local energy decay of solutions for the equations of motion of compressible viscous and heat-conductive gasses in an exterior domain in R^3 629

Michael Reissig and Karen Yagdjian: On the Stokes matrix for a family of infinitely degenerate operators of second order 671

Masashi Kosuda: Representation of q -analogue of rational Brauer algebras 707

E. Ballico and S. J. Kim: Weierstrass points and ramification loci on singular plane curves..... 729

Tatsushi Morioka: Hypoellipticité pour un certain opérateur à caractéristique double 739

Younki Chae and Keunbae Choi: Reachable sets in Lie groups 763

Hiroshi Hosokawa: Induced mappings on hyperspaces II..... 773

Hiroshi Ando: The Cauchy problem for Schrödinger type equation with degeneracy 785

J.R. Garcia Rozas and Blas Torrecillas: Torsion injective covers and resolvents..... 795

Shou Lin: Mapping theorems on K -semistratifiable spaces 809
