

CONTENTS

Toshiaki Adachi, Sadahiro Maeda and Seiichi Udagawa: Simpleness and closedness of circles in compact Hermitian symmetric spaces.....	1
Mark L. Teply and Seog Hoon Rim: On coverings of modules	15
Nakao Hayashi, Pavel I. Naumkin and Patrick-Nicolas Pipolo: Analytic smoothing effects for some derivative nonlinear Schrödinger equations	21
Xiaowei Xu and Reiko Sakamoto: Boundary value problems related to differential operators with coefficients of generalized Hermite operators	35
Tatsuya Arakawa: A note on normally generated line bundles on compact Riemann surfaces II	59
Katsuro Sakai and Shigenori Uehara: Spaces of upper semi-continuous multi-valued functions on separable metric spaces	69
Sandra Lucente: Nonlinear wave equation with potential	81
Tatsuji Tanaka: On the Chow-forms of elliptic normal curves of degree 4	109
Hiroyuki Kurihara: The type number on real hypersurfaces in a quaternion space form	127
Li Ma: On the existence of solutions of prescribing scalar curvature problem ..	133
Ryosuke Ichida: The injectivity radius and the fundamental group of compact homogeneous Riemannian manifolds of positive curvature.....	139
Janusz J. Charatonik and Pavel Pyrih: Atomic mappings can spoil lightness of open mappings	157
Daigo Hirohashi, Takahiro Kanno and Hiroyuki Tasaki: Area-minimizing of the cone over symmetric R -spaces	171
Reiko Aiyama and Kazuo Akutagawa: Kenmotsu type representation formula for spacelike surfaces in the de Sitter 3-space	189
Toshiji Terada: Topological lattices $C_k(X)$ and $C_p(X)$: Embeddings and Isomorphisms.....	197
Shin-ichi Kasai: On the microlocal structure of regular simple prehomogeneous vector space $(GL(1)^2 \times SL(7), \Lambda_3 + \Lambda_1^*)$	209
