

CONTENTS

Gladys Chalom and Hector Merklen: Representation type of one point extensions of tilted euclidean algebras .....	1
Yasuo Kamata: The algorithm to calculate the period matrix of the curve $x^m + y^n = 1$ .....	15
Yasuyuki Nagatomo: Singular sets of ideal instantons and Poincaré duality .....	39
Wu Bing-Ye: 1-Type minimal surfaces in complex Grassmann manifolds and its Gauss map .....	49
Hong Jae Kang: Integral geometry on product of spheres .....	61
Satomi Oka: On the common divisor of discriminants of integers.....	69
Reiko Sakamoto: Numerical approximation of weak solutions for boundary value problems .....	79
Bang-yen Chen and Luc Vrancken: Lagrangian submanifolds of the complex hyperbolic space.....	95
Tooru Sasahara: On Chen invariant of CR-submanifolds in a complex hyperbolic space.....	119
E. Ballico: Trigonal Gorenstein curves and Weierstrass points .....	133
Camillo Costantini and Valentin Gutev: Recognizing special metrics by topological properties of the “metric”-proximal hyperspace.....	145
Toshiyuki Ichiyama: The first variation formula for Weyl structures .....	171
Adriana Nenciu: The center construction for weak Hopf algebras.....	189
