

CONTENTS

Masahiro Kaminaga and Fumihiko Nakano: Spectral properties of quasi-periodic Kronig-Penney model.....	205
Aleksander Grytczuk and Jarosław Grytczuk: Ljunggren's trinomials and matrix equation $A^x + A^y = A^z$ .....	229
Yoshitomo Baba and Hiroyuki Miki: On strongly almost hereditary rings .....	237
Naoya Ando: A class of real-analytic surfaces in the 3-Euclidean space.....	251
Shuan-hong Wang: A construction of braided Hopf algebras .....	269
Masanori Kôzaki and Sadahiro Maeda: A characterization of extrinsic spheres in a Riemannian manifold.....	291
J. N. Alonso Alvarez, J. M. Fernández Vilaboa and R. González Rodríguez: The Hopf algebra structure of a crossed product in a braided monoidal category.....	299
Masakazu Takiguchi: An extension of Rauch comparison theorem to glued Riemannian spaces.....	313
Norifumi Yamatani: $S^4$ -formula and $S^2$ -formula for quasi-triangular biFrobenius algebras.....	339
Sorin Dragomir and Jun Masamune: Cauchy-Riemann orbifolds .....	351
Reiko Sakamoto: Dirichlet-Neumann problem in a domain with piecewise-smooth boundary .....	387
Kazunari Sugiyama: $b$ -Functions of regular simple prehomogeneous vector spaces.....	407
