

CONTENTS

Fumihiko Hirosawa and Hideo Nakazawa: Rapid decay of the total energy for dissipative wave equations	217
Atsuko Fujisawa: The classification of 3-dimensional hypersurface purely elliptic singularities of $(0, 1)$ -type	233
Seiji Hiraba: Asymptotic estimates for densities of multi-dimensional stable distributions	261
Tetsuya Hosaka: A splitting theorem for CAT (0) spaces with the geodesic extension property	289
Mohamed Tahar Kadaoui Abbassi and Maâti Sarih: Killing vector fields on tangent bundles with Cheeger-Gromoll metric.....	295
Koji Tsushima: On a decomposition of Bruhat type for a certain finite group	307
Saburô Uchiyama: On the generalized Josephus problem.....	319
J. Hančl and S. Sobková: A general criterion for linearly unrelated sequences	341
Satoru Kikuchi: Bound for the Weierstrass weights of points on a smooth plane algebraic curve.....	359
Taka-aki Tanaka: Algebraic independence of Fibonacci reciprocal sums associated with Newton's method	375
Tatsuo Nishitani and Jean Vaillant: Smoothly symmetrizable systems and the reduced dimensions II	389
Yoshio Tanaka and Yuuko Shimizu: Products of k -spaces, and special countable spaces	405
Yuki Kurokawa and Hiroyuki Takamura: A weighted pointwise estimate for two dimensional wave equations and its application to nonlinear systems	417
