

CONTENTS

Mami Matsuda: Bifurcation of the Kolmogorov flow with an external friction.....	1
Nobuya Suzuki: Models of Peano arithmetic as modules over initial segments.....	19
Zejun Hu and Haizhong Li: A rigidity theorem for hypersurfaces with positive Möbius Ricci curvature in S^{n+1}	29
Saburô Uchiyama: A note on the generalized Josephus problem	49
Takuma Ogawa: Similarities between the trigonometric function and the lemniscate function from arithmetic view point.....	65
Takumi Yamada: A construction of compact pseudo-Kähler solvmanifolds with no Kähler structures.....	79
Reiko Sakamoto: Energy method for numerical analysis.....	111
Gabriela Putinar: Finite jet determination for biholomorphisms of real-analytic hypersurfaces in C^N	147
Shin-ichi Yasutomi: On a new algorithm for inhomogeneous Diophantine approximation.....	173
Kaori Yamazaki: Extending pointwise bounded equicontinuous collections of functions	197
Reiko Sakamoto: A complete sequence of orthogonal subsets in $H^M(\mathbf{R}^n)$ and a numerical approximation for boundary value problems.....	215
Yun Myung Oh and Joon Hyuk Kang: Lagrangian H -umbilical submanifolds in quaternion Euclidean spaces	233
Takahiko Furuya: On an algebra associated with a circular quiver and its periodic projective bimodule resolution	247
Gastón Andrés García: On Hopf algebras of dimension p^3	259
