

CONTENTS

Jan van Mill, Mikhail G. Tkachenko, Vladimir V. Tkachuk, and Richard G. Wilson: Local properties and maximal Tychonoff connected spaces.....	241
Tatsuo Nishitani and Jean Vaillant: Smoothly symmetrizable complex systems and the real reduced dimension	259
Masaru Iizuka, Miyuki Maeno and Matsuyo Tomisaki: Asymptotic conditional distributions related to one-dimensional generalized diffusion processes	273
Jong Taek Cho: Levi-parallel hypersurfaces in a complex space form	329
Taka-aki Tanaka: Algebraic independence of modified reciprocal sums of products of Fibonacci numbers.....	345
Dorota Kowalczyk: On the Reissner-Nordström-de Sitter type space-times	363
Katsumi Nagai: The integrated density of states of one-dimensional random Schrödinger operator with white noise potential and background.....	383
Vitalij A. Chatyrko: Subspaces of the Sorgenfrey line and their products.....	401
Alessia Ascanelli: Gevrey well posedness for a second order weakly hyperbolic equation with non regular in time coefficients.....	415
Hiroshi Tanaka and Hirokazu Yokoyama: Quantifier elimination of the products of ordered abelian groups	433
Florian Luca and Igor E. Shparlinski: On the number of polynomial maps into \mathbf{Z}_n	439
