

CONTENTS

U-Hang Ki and Hiroyuki Kurihara: Commuting structure Jacobi operators for real hypersurfaces in complex space forms II.....	127
Nobukazu Shimeno and Yuichi Tamaoka: The hypergeometric function for the root system of type $A$ with a certain degenerate parameter ....	155
Yutaka Iwamoto: An indecomposable continuum as subpower Higson corona .....	173
Katsusuke Nabeshima and Shinichi Tajima: Computation methods of logarithmic vector fields associated to semi-weighted homogeneous isolated hypersurface singularities .....	191
Yasser F. Ortiz-Castillo, Artur Hideyuki Tomita and Takamitsu Yamauchi: Higson compactifications of Wallman type .....	233
Yasuhiro Hara: A topological proof of Chen's alternative Kneser coloring theorem.....	251
Ryota Umezawa: On an analog of the Arakawa-Kaneko zeta function and relations of some multiple zeta values.....	259
Yuji Kasahara: A note on the product of independent random variables with regularly varying tails.....	295
Yasuyuki Kachi and Pavlos Tzermias: A formula for the Hurwitz zeta function, Riemann's functional equation and certain integral representations .....	309
