K. YONEDA, Dirichlet sets and some uniqueness theorems for Walsh series 1

J. KOMORNÍK, Asymptotic periodicity of the iterates of weakly constrictive Markov operators 15

H. MORI, Rotational surfaces in a pseudo-Riemannian 3-sphere 29

G. CAIRNS, A general description of totally geodesic foliations 37

K. II, On a Bargmann-type transform and a Hilbert space of holomorphic functions 57

Z.-C. WANG, Periodic solutions of linear neutral integro-differential equations 71

H. NAKAJIMA, Affine torus embeddings which are complete intersections 85

A. YAMADA, Small deformations of certain compact manifolds of Class L 99

T. KIZUKA, Rational functions of C^*-type on the two-dimensional complex projective space 123
