

CONTENTS

	Page
Y. HAGA, On approximately finite algebras.....	325
K. SAITÔ, On the embedding as a double commutator in a type 1 AW^* -algebra II.....	333
T. E. CECIL, A characterization of metric spheres in hyperbolic space by Morse theory.....	341
K. SATÔ, Infinitesimal affine transformations of the tangent bundles with Sasaki metric	353
M. NAKAI, Densities without Evans solutions.....	363
L. GLUCK, On the averages of Fourier-Stieltjes coefficients.....	371
S. D. RIEMENSCHNEIDER, Compactness of a class of Volterra operators	385
K. SAKAMOTO, On the topology of quaternion Kähler manifolds.....	389
S. NAKATA, On the divergence of rearranged Walsh series II	407
Y. KUBOKAWA, A local ergodic theorem for semi-group on L_p	411
S. SAKAI, On automorphism groups of II_1 -factors	423
H.-C. LAI, Multipliers of a Banach algebra in the second conjugate algebra as an idealizer.....	431
H.-C. LAI, Restrictions of Fourier transforms on A^p	453
A. HATTORI, Equivariant characteristic numbers and integrality theorem for unitary T^n -manifolds.....	461
