CONTENTS

Page

J. D. HILL, Almost-convergent double sequences ……105

K. TSUCHIDA, The homology decomposition for a cofibration ……117

E. H. FELLER, Noetherian modules and Noetherian injective rings ……130

N. MOCHIZUKI, The tensor product of function algebras ……139

T. SAITO AND T. YOSHINO, On a conjecture of Berberian ……147

H. WATANABE, Summability of double Fourier series ……150

F. UCHIDA, Immersions and embeddings of tangent undles……161

Y. HATAKEYAMA, On the integrability of a structure defined by two semi-simple 0-defomable vector 1-forms which commute with each other……171

E. ABE, Generation on some discrete subgroups of simple algebraic groups ……178

I. SATÔ, Almost analytic vector fields in almost complex manifolds ……185

S. IGARI, Sur les fonctions qui opèrent sur l'anneau de Dirichlet $D(G)$ …200

T. SAITO, Some remarks on a representation of a group, II ……206

Y. SUZUKI, Saturation of local approximation by linear positive operators ……210
