

CONTENTS

	Page
Parameswaran SANKARAN: K -rings of smooth complete toric varieties and related spaces	459
Elena CHIERICI and Gianluca OCCHETTA: Fano fivefolds of index two with blow-up structure	471
Zejun HU and Shujie ZHAI: Classification of Möbius isoparametric hypersurfaces in the unit six-sphere	499
Panki KIM and Renming SONG: Intrinsic ultracontractivity of non-symmetric diffusion semigroups in bounded domains	527
Koji TOJO: Complex structures, totally real and totally geodesic submanifolds of compact 3-symmetric spaces, and affine symmetric spaces	549
Shun SHIMOMURA: Nonlinear differential equations of second Painlevé type with the quasi-Painlevé property along a rectifiable curve	581
Sadahiro MAEDA and Toshiaki ADACHI: Extrinsic geodesics and hypersurfaces of type (A) in a complex projective space	597

For Volumes 1 (1949) through 41 (1989), the first page of each article can be viewed online at Project Euclid (<http://projecteuclid/tmj>).
Authors who prefer to opt out of this arrangement are requested to contact the Editorial Office at henshu@math.tohoku.ac.jp.
