

CONTENTS

	Page
Kentaro ITOH, Ryozi SAKAI and Noriaki SUZUKI: Exponentially weighted Polynomial approximation for absolutely continuous functions	1
Yuuki SHIRAISHI: On Frobenius manifolds from Gromov–Witten theory of orbifold projective lines with r orbifold points	17
Masahiko YOSHINAGA: Worpitzky partitions for root systems and characteristic quasi-polynomials	39
Shigeki AIDA, Takanori KIKUCHI and Seiichiro KUSUOKA: The rates of the L^p -convergence of the Euler-Maruyama and Wong-Zakai approximations of path-dependent stochastic differential equations under the Lipschitz condition	65
Chuan-Zhong CHEN, Li MA and Wei SUN: Stochastic calculus for Markov processes associated with semi-Dirichlet forms	97
Adam OSĘKOWSKI: Sharp L^p -bounds for the martingale maximal function	121
Takafumi AMABA and Kazumasa KUWADA: A coupling of Brownian motions in the \mathcal{L}_0 -geometry	139
