

Contents

PART A. MARKOV CHAINS AND BRANCHING PROCESSES

The Decomposition-Separation Theorem for Finite Nonhomogeneous Markov Chains and Related Problems	
<i>Isaac M. Sonin</i>	1
Conditional Limit Laws and Inference for Generation Sizes of Branching Processes	
<i>P. E. Ney, A. N. Vidyashankar</i>	17
Absorption Time Distribution for an Asymmetric Random Walk	
<i>S. N. Ethier</i>	31

PART B. STOCHASTIC DIFFERENTIAL EQUATIONS

Fractional Stability of Diffusion Approximation for Random Differential Equations	
<i>Yuriy V. Kolomiets</i>	41
From Particles with Random Potential to a Nonlinear Vlasov–Fokker–Planck Equation	
<i>Jin Feng</i>	63
Diffusion Processes on Manifolds	
<i>Fabrice Debbasch, Claire Chevalier</i>	85
Stochastic Equations Driven by a Cauchy Process	
<i>Vladimir P. Kurenok</i>	99

PART C. FILTERING

On Detecting Fake Coin Flip Sequences	
<i>Michael A. Kouritzin, Fraser Newton, Sterling Orsten, Daniel C. Wilson</i>	107
A Class of Multivariate Micromovement Models of Asset Price and Their Bayesian Model Selection via Filtering	
<i>Laurie C. Scott, Yong Zeng</i>	123

PART D. STOCHASTIC CONTROL

Determining the Optimal Control of Singular Stochastic Processes Using Linear Programming	
<i>Kurt Helmes, Richard H. Stockbridge</i>	137
A Degenerate Variance Control Problem with Discretionary Stopping	
<i>Daniel Ocone, Ananda Weerasinghe</i>	155

PART E. STOCHASTIC NETWORKS AND QUEUEING

Double Skorokhod Map and Reneging Real-Time Queues	
<i>Lukasz Kruk, John Lehoczky, Kavita Ramanan, Steven Shreve</i>	169
Bounding Stationary Expectations of Markov Processes	
<i>Peter W. Glynn, Assaf Zeevi</i>	195
Internet Traffic and Multiresolution Analysis	
<i>Ying Zhang, Zihui Ge, Suhas Diggavi, Z. Morley Mao, Matthew Roughan, Vinay Vaishampayan, Walter Willinger, Yin Zhang</i>	215
Maximum Queue Length of a Fluid Model with an Aggregated Fractional Brownian Input	
<i>Tyrone E. Duncan, Yasong Jin</i>	235

Fluid Model for a Data Network with α-Fair Bandwidth Sharing and General Document Size Distributions: Two Examples of Stability	
<i>H. C. Gromoll, R. J. Williams</i>	253
PART F. FINANCE	
No Arbitrage and General Semimartingales	
<i>Philip Protter, Kazuhiro Shimbo</i>	267
Optimal Asset Allocation under Forward Exponential Performance Criteria	
<i>Marek Musiela, Thaleia Zariphopoulou</i>	285
Estimates of Dynamic VaR and Mean Loss Associated to Diffusion Processes	
<i>Laurent Denis, Begoña Fernández, Ana Meda</i>	301
PART G. POPULATION GENETICS	
A Duality Identity between a Model of Bacterial Recombination and the Wright-Fisher Diffusion	
<i>Xavier Didelot, Jesse E. Taylor, Joseph C. Watkins</i>	315
