Biography of William E. Strawderman viii

Publications of William E. Strawderman x

Density estimation in high and ultra high dimensions, regularization, and the L_1 asymptotics
Anirban DasGupta and S.N. Lahiri 1

Minimax estimation of linear combinations of restricted location parameters
Tatsuya Kubokawa 24

Bayesian predictive densities for linear regression models under α-divergence loss: Some results and open problems
Yuzo Maruyama and William E. Strawderman 42

Multiple rank tests for pairwise comparisons
Arthur Cohen and Harold Sackrowitz 57

Reducing data nonconformity in linear models
Andrew L. Rukhin 64

Minimax ℓ_q risk in ℓ_p balls
Cun-Hui Zhang 78

A weak functional framework for applications in statistics
Adel Blouza, Dominique Fourdrinier and Patrice Lepelletier 90

Inadmissible estimators of normal quantiles and two-sample problems with additional information
Éric Marchand, Mohammad Jafari Jozani and Yogesh Mani Tripathi 104

Asymptotic admissibility of priors and elliptic differential equations
John A. Hartigan 117

Multiagent estimators of an exponential mean
Constance van Eeden and James V. Zidek 131

On hierarchical prior specifications and penalized likelihood
Robert L. Strawderman and Martin T. Wells 154

Accurate approximations to the distribution of a statistic testing symmetry in contingency tables
John E. Kolassa and Hema Gayat Bhagavatula 181

A nonparametric Bayesian method for estimating a response function
Scott Brown and Glen Meeden 190

CD posterior – combining prior and data through confidence distributions
Kesar Singh and Minge Xie 200

Bayesian prediction with adaptive ridge estimators
David G.T. Denison and Edward I. George 215

Ensemble classifiers
Dhammika Amaratunga, Javier Cabrera, Yauheniya Cherckas and Yung-Seop Lee . . . 235

Bayesian analysis of deer reproductive condition
Edwin J. Green and Susan Predl 247
